DETAILED ACTION

Amendment

1. Receipt is acknowledged of the after-final amendment filed 13 February 2006.

Allowable Subject Matter

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of McAdams and Jachimowicz fails to teach the limitations of the claims, mainly the arrangement of the mirror which is rotationally movable around two axes with reference to the substrate. In addition, the best prior art of record fails to teach that the chip card holding means and the light source holding means are implemented so that the light source holding means may hold the light source so that an angle between the light beam and mirror is greater than 0 degrees and less than 90 degrees, and further that the angle is 45 degrees. Hence the best prior art of record fails to teach the invention as set forth in claims 1-18 and the examiner can find no teaching of the specific chip card and chip card reading device, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 13 February 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
